To	Lindemann Miller LLP 233 S Wacker Dr. Suite 8400 Chicago, IL 60606 US

Task	Rate	Qty	Amount
Bucket of hours for current discovery and planning. This time will be needed to look at Relativity and the provided xml data export and file export in closer detail.	\$115	6	\$690
Create a SharePoint Online site collection to store migrated and future content. Also, I will need to create a document library for Acorn files to be moved to during this project as well as add/configure the ~35 required metadata columns (will be provided by the client).	\$115	6	\$690
Upload Acorn files (~30GB) into SharePoint Online. This data will be provided by the client, which I can migrate at about 4GB per hour.	\$115	8	\$920

Based on the data discovery, I will create a Power Automate process that can take in an XML file provided by Relativity and then loop within the documents in the Acorn document library and populate the metadata according to the XML file. Each file has an ID (primary key) that will be used to find the correct file in the Acorn document library within each loop iteration. I will need to manipulate and format the XML file to work with Power Automate.

This workflow can be slightly modified to work with future data imports from Relativity to SharePoint Online.
